Developing an Eye for Accuracy Manufacturing sector

Compare each item in Column 1 to its match in Column 2. If the items are the same, put a tick in the 'S' column. If the items are different, put a tick in the 'D' column, and then circle the error in Column 2. Please write how long it takes you to complete this exercise on the front of this paper.

How did you do?

There are just 25 pieces of information to compare and verify in the test – just one mistake equates to a 4% error rate. The test should take no more than three minutes to complete. Imagine if your people made one error every three minutes! That's 20 errors every hour and 140 errors in a seven-hour day. It's easy to see how it mounts up.

What does it mean?

Our results show that people working in the manufacturing sector have an average error rate of 3.6% and typically spend 22% of their time making, finding and fixing mistakes. No-one likes having to re-do work and sort out problems arising from mistakes. Accuracy skills training boosts personal effectiveness and organisational efficiency.

That's 22% of your company's salary bill

It's like employing your own error department!

Results show a 60% reduction in errors!

That's £2,627 saved per person per year

Proven to work

Since 2003 we have been working with the manufacturing sector equipping administrative and quality control teams to accurately process information by improving their numeracy and data-transfer skills. Typically, our participants achieve a 60% reduction in errors. A return on investment saving is calculated through the value of time saved through making fewer errors. The typical saving within the sector is £2,627 per person per year.

Which workshop is best for you?

Developing an Eye for Accuracy

Our flagship in-house workshop for people who work with data and information

Preventing Mistakes at Work

Our practical in-house workshop for reducing the incidence of 'silly' human error

Accurate Written Communication

Our interactive in-house workshop for people who work with documents and emails

One-day Accuracy Skills

Our open workshop for individuals seeking to improve their attention to detail

Alice Hubbard

Senior Account Manager, Scott Bradbury Limited.

Where do we get our facts and figures from? The results are taken from the last ten *Developing an Eye for Accuracy* workshops delivered for the manufacturing sector. The average salary of the participants is £22,000 (working 37.5 hours per week). Figures last updated September 2019.
