How did you do? And what does it mean?

There are just 25 pieces of information to compare and verify in the test – just one mistake equates to a 4% error rate. The test should take no more than three minutes to complete. Imagine if your people made one error every three minutes! That's 20 errors every hour and 140 errors in a seven-hour day. It's easy to see how it mounts up.

An average error rate of just 3% wastes around 20% of your salary bill in lost productivity alone. No-one likes having to re-do work and sort out problems arising from mistakes. Accuracy skills training boosts personal effectiveness and organisational efficiency.

Proven to work

For fifteen years we've been working with organisations to improve their people's accuracy skills. Typically, participants achieve a 60% reduction in errors.

Our unique programmes

Developing an Eye for Accuracy – our flagship in-house data accuracy programme for people who work with information

Preventing Mistakes at Work – our practical in-house workshop for reducing the incidence of 'silly' human error

Accurate Documentation Skills – our practical in-house workshop for people who work with written communications

One-day Accuracy Skills – our open course for individuals seeking to improve their attention to detail

Free consultation

A free consultation enables you to explore how accuracy training works and the typical cost savings and productivity gains you can expect to achieve. Pick up useful advice on how accuracy skills training relates to the work your people do and how you can take advantage of the proven methodologies for reducing error.
