

Developing an Eye for Accuracy

Improves the quality and reputation of your operations, delivers cost-saving gains and increases productivity. Getting it right first time, every time.

Working for the food, drink and groceries sector

Data accuracy is essential in the food, drink and groceries sector. Quality product manufacturing, ordering processes, smooth distribution and high customer satisfaction all rely on accurate data. Even small errors waste time and cost money.

The average error rate for our food clients is 3.6%.

Meaning 3.6 in every 100 pieces of data your people process contains a mistake.

Our research suggests once a mistake is made it takes twice as long to track down and twice as long again to fix.

Results show that people working within the food, drink and groceries sector typically spend 21.5% of their time making, finding and fixing mistakes.

That's 21.5% of your company's salary bill

It's like employing your own error department!

Results show a 58% reduction in errors!

That's £2,566 saved per person per year

Measurable results prove return on investment

All participants take a test assessment at the beginning and the end of the training. This tracks their improvement in accuracy and processing speed.

Results show the training measurably reduces data error within the food, drink and groceries sector by 58%.

The return on investment is calculated through the value of the time saved through making fewer errors. The typical saving within the food, drink and groceries sector is £2,566 per person per year.

Think about **GREATER PRODUCTIVITY** - more achieved in the time saved through improved accuracy and greater efficiency

Think about the **MONEY SAVED** - fewer fines, compensation payments and lost business opportunities

Think about **NEW SKILLS** - developing core abilities such as accurate data transfer, concentration, attention to detail, checking and consistency

Think about **WELLBEING** - fewer complaints and less re-work mean less stress, less hassle and a happier workforce
