

Developing an  
Eye for Accuracy

Improves the quality and reputation of your operations,  
delivers cost-saving gains and increases productivity.  
Getting it right first time, every time.

# Working for the education sector

Data accuracy is essential for universities and colleges. Student and employee records and an efficient admissions process rely on accurate data. Mistakes which take only a few seconds to make have big repercussions.

The average error rate for our education clients is 2.94%.

Meaning 2.94 in every 100 pieces of data your people process contains a mistake.

Our research suggests once a mistake is made it takes twice as long to track down and twice as long again to fix.

Results show that people working within the education sector typically spend 17.5% of their time making, finding and fixing mistakes.

**That's 17.5% of your  
salary bill**

It's like  
employing your  
own error  
department!

ERRORS

Results show a 49%  
reduction in errors!

**That's £1,664 saved  
per person  
per year**

## Measurable results prove return on investment

All participants take a test assessment at the beginning and the end of the training. This tracks their improvement in accuracy and processing speed.

Results show the training measurably reduces data error within the education sector by 49%.

The return on investment is calculated through the value of the time saved through making fewer errors. The typical saving within the education sector is £1,664 per person per year.

Think about **GREATER PRODUCTIVITY** – more achieved in the time saved through improved accuracy and greater efficiency

Think about the **MONEY SAVED** – fewer fines, compensation payments and lost business opportunities

Think about **NEW SKILLS** – developing core abilities such as accurate data transfer, concentration, attention to detail, checking and consistency

Think about **WELLBEING** – fewer complaints and less re-work mean less stress, less hassle and a happier workforce
