How did you do?

There are just 25 pieces of information to compare and verify in the test – just one mistake equates to a 4% error rate. The test should take no more than three minutes to complete. Imagine if your people made one error every three minutes! That's 20 errors every hour and 140 errors in a seven-hour day. It's easy to see how it mounts up.

What does it mean?

Our results from the ten most recent courses delivered show participants have an average error rate of 3%. We find people typically spend 19% of their time making, finding and fixing those mistakes. No-one likes having to re-do work and sort out problems arising from mistakes. Accuracy skills training boosts personal effectiveness and organisational efficiency.

That's 19% of your company's salary bill

It's like employing your own error department!

Results show a 57% reduction in errors!

That's £1,932 saved per person per year

Proven to work

Since 2003 we have been working with organisations across the UK to improve people's accuracy skills. The training improves the quality of your operations, delivers cost-saving gains and increases productivity. Typically, our participants achieve a 57% reduction in errors. A return on investment saving is calculated through the value of time saved through making fewer errors. The typical saving is £1,932 per person per year. Think also of the savings from fewer fines, fewer compensation payments and improved reputation!

Which workshop is best for you?

Developing an Eye for Accuracy

Our flagship in-house workshop for people who work with data and information

Accurate Written Communication

Our interactive in-house workshop for people who work with documents and emails

Preventing Mistakes at Work

Our practical in-house workshop for reducing the incidence of 'silly' human error

One-day Accuracy Skills

Our open workshop for individuals seeking to improve their attention to detail
