

Accuracy skills training for the **manufacturing** sector

Accuracy skills training is amongst the quickest, most efficient performance improvements you can make to your operations – and it's proven to work.

Working for the manufacturing sector

Data accuracy is essential in relation to quality control in the manufacturing sector. Parts and products built incorrectly wastes time and money. Is your supply chain operating as efficiently as it could? Since 2003, our flagship *Developing an Eye for Accuracy* in-house training programme has been proven to save money and boost productivity for our manufacturing clients. Results from the last ten most recent courses delivered within this sector (up to August 2018), show a saving per participant per annum of £2,504. This is purely the value of the time saved through making fewer errors and does not include savings from fewer fines or compensation payments.

Measurable results

Participants complete pre-course and post-course assessments which track their reduction in errors. Follow-up resources and assessments in the months after the training help your people sustain what they have learnt.

What the results show

The typical pre-course error rate for the manufacturing sector is 3.59% – above the national average. This means an error occurs in 3.59 of every 100 transactions. Organisations can spend 18-20% of their people's salary bill on making, finding and correcting mistakes. The cost of the wasted time is equivalent to employing your own 'Error Department'.

Results from the last ten courses:

**Pre-course
error rate**

3.59%

Wasting **£4,536**
per person per annum

**Post-course
error rate**

1.48%

Saving **£2,504**
per person per annum

Who is the course for?

Developing an Eye for Accuracy is for people who spend 25% or more of their day handling data. This includes job titles such as:

- Financial Analyst
- Credit Controller
- Purchasing Manager
- Production Support
- Quality Assurance Advisor
- HR Assistant
- HR Manager
- Payroll Specialist
- Candidate Co-ordinator
- Customer Services Advisor
- Customer Agent
- Marketing Executive
- Personal Assistant.

Types of data:

- Part numbers
- Serial numbers
- Line numbers
- Lot trace numbers
- Purchase order numbers
- Invoice numbers
- Product codes
- Colour codes
- Strip reports
- Names
- Postal addresses
- Email addresses
- Account numbers
- Sort codes
- Salaries
- National insurance numbers.

Skills developed:

- Accurate data transfer
- Attention to detail
- Concentration
- Checking
- Consistency.

Accuracy training will work for you

Imagine reducing your people's mistakes by 59%, meaning they are:

- More efficient and productive – getting more done correctly in the time available
- Dealing with fewer complaints – providing excellent customer service, not fire fighting
- Less stressed – needing to do much less re-work and feeling positive about their role.

Experience accuracy training in action

The best way to assess the value of accuracy skills training is to participate in a demonstration at your offices. It's an informal, lively presentation punctuated by practical activities designed to get you involved in thinking about the subject of accuracy and the consequences of errors. We'll look at examples of how other similar organisations have benefited, details of cost and delivery, and there will be plenty of time for questions. You'll learn:

- Why all human beings make mistakes
- Insights into 'the three Cs' of Accuracy: Checking, Consistency and Concentration
- How much errors are currently costing you
- How the *Developing an Eye for Accuracy* techniques relate to the work your people do
- Tips for reducing error
- How the training is delivered and what you can expect to achieve
- How to sustain accuracy improvements back in the workplace.
